OBJECTIVE

4th-year Computer Science student at Georgia Tech with hands-on experience in advanced analytics, data-driven consulting, and AI backend development. Interested in building impactful analytics solutions.

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science

Expected Dec 2026

GPA: 3.6/4.0

- **Concentration:** Artificial Intelligence and Information Internetworks
- **Relevant Coursework:** Data Structures & Algorithms, Systems & Networks, Computer Organization & Programming, Database Systems, Computer Networking, Linear Algebra, Calculus, Probability & Statistics
- **Involvement:** Transfer2Tech Mentorship Program, IFC Social Committee Safety Coordinator, Lambda Chi Alpha Founding Father, Catholic Center Member

EXPERIENCE

Incoming Bulk Power Operations Intern

Aug 2025 – Dec 2025

Southern Company

Birmingham, AL

- Developing predictive models for power surges to enhance grid stability and operational efficiency.

Advanced Analytics Intern

May 2025 – Aug 2025

UCB

Smyrna, GA

- Developed and prototyped a proprietary **BERT-based deep learning model** for advanced patient similarity analysis to enhance clustering accuracy, patient matching, and misdiagnosis detection.
- Performed left-truncated **Kaplan–Meier survival modeling** on a commercial drug, providing the medical team with more accurate and actionable patient survival metrics.
- Conducted subpopulation-level analysis of anti-epileptic drug usage in CDKL5 Deficiency Disorder (CDD) patients using **Komodo Health's Sentinel** real-world data platform, affirming the absence of alarming usage patterns.

Software Engineer Intern

May 2024 – Aug 2024

The Parker Avery Group

Atlanta, GA

- Built the firm's **Generative AI** initiatives within a **Scrum** framework, applying retail analytics knowledge.
- Achieved a **50%** reduction in AI processing costs and improved efficiency by leveraging OpenAI's **Batch API** to enable asynchronous processing of large-scale data jobs.
- Increased predictive model accuracy by **20%+** by generating a specialized training dataset using advanced **PostgreSQL** queries, addressing bias and accuracy questions in retail time series forecasting.
- Ensured consistent setups and streamlined onboarding by standardizing development environments with **Mamba** YAML files, supported by comprehensive and well-structured **documentation**.

PROJECTS

Enhanced Spotify Wrapped | *Java, Android SDK, Firebase, Git, Figma*

- Integrated **custom AI** to enhance the app with conversational capabilities tailored to individual user preferences, personalizing and improving the app experience.
- Implemented a **CI/CD** pipeline using GitHub Actions for automating testing with **Gradle**, reducing build errors.
- Used **Firebase** to manage account creation, login, and secure user credentials, ensuring robust **data protection**.
- Designed the front end in **Figma** and transferred the layouts to **XML** for **Android** implementation, ensuring design consistency across the app.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, HTML/CSS

Libraries/Frameworks: Pandas, NumPy, Matplotlib, PyTorch, Transformers, LangChain, JUnit, Tailwind

Development Tools: Docker, Git, Jira, Figma, Wireshark, Mamba

Cloud/Databases: Databricks, Snowflake, PostgreSQL, MySQL, Firebase, Milvus
